

Tour Length Comparison - 200-City Maps

Only tour length is shown. Source 100-200 values are sorted within each panel by BlindBlendACO tour length: 1-101.

Algorithm colors

BaselineACO

BlindBlendACO

ElitistACO

MaxMinACO

Tour length averages

With Cross Check

BaselineACO: 46,002

BlindBlendACO: 43,643

ElitistACO: 45,865

MaxMinACO: 43,904

Without Cross Check

BaselineACO: 47,534

BlindBlendACO: 44,812

ElitistACO: 47,056

MaxMinACO: 45,660

With Cross Check

This line chart displays the tour length for four algorithms across 101 sorted maps/runs. The y-axis, labeled 'Tour length', ranges from 40,108 to 51,574. The x-axis, labeled 'Sorted map / run index', ranges from 1 to 101. The algorithms are represented by colored lines: BaselineACO (blue), BlindBlendACO (purple), ElitistACO (red), and MaxMinACO (green). Horizontal dashed lines indicate the average tour length for each algorithm. BlindBlendACO has the lowest average tour length, followed by MaxMinACO, BaselineACO, and ElitistACO. The lines show significant fluctuations, with ElitistACO generally having the highest tour lengths.

Algorithm	Average Tour Length
BaselineACO	46,002
BlindBlendACO	43,643
ElitistACO	45,865
MaxMinACO	43,904

Without Cross Check

This line chart displays the tour length for the same four algorithms across 101 sorted maps/runs. The axes and legend are identical to the 'With Cross Check' chart. The tour lengths are generally higher than in the 'With Cross Check' scenario. The relative performance of the algorithms remains similar, with BlindBlendACO still having the lowest average tour length and ElitistACO having the highest. The fluctuations in the lines are more pronounced, particularly for ElitistACO and BaselineACO.

Algorithm	Average Tour Length
BaselineACO	47,534
BlindBlendACO	44,812
ElitistACO	47,056
MaxMinACO	45,660

Sorted map / run index
